

Quick Start Guide

995 ATTENUATORS

Legendary Analog Attenuator Module for Eurorack

Controls

Attenuator knobs – Adjust the level of the input signal passively from $-\infty$ to unity (0 dB).

IN and OUT jacks – A single input connected to the top attenuator will pass to all 3 outputs when all the attenuators are open. Additional inputs in the lower attenuators will break the chain so that input 1 (top) will only feed output 1, input 2 will only feed output 2 and input 3 will only feed output 3.

Installation

The necessary screws are included with the module for mounting in a Eurorack case. Connect the power cable before mounting.

Depending on the rack case, there may be a series of fixed holes spaced 2 HP apart along the length of the case, or a track that allows individual threaded plates to slide along the length of the case. The free-moving threaded plates allow precise positioning of the module, but each plate should be positioned in the approximate relation to the mounting holes in your module before attaching the screws.

Hold the module against the Eurorack rails so that each of the mounting holes are aligned with a threaded rail or threaded plate. Attach the screws part way to start, which will allow small adjustments to the positioning while you get them all aligned. After the final position has been established, tighten the screws down.

Specifications

Signal Input	
Type	3.5 mm jack, half normalised, DC coupled
Impedance	< 25 k Ω , unbalanced
Maximum input level	+20 dBu
Signal Output	
Type	3.5 mm jack, DC coupled
Impedance	< 25 k Ω , unbalanced
Maximum output level	+20 dBu
Controls	
Attenuators	$-\infty$ to unity gain, passive
Physical	
Dimensions	35 x 40 x 129 mm (1.4 x 1.6 x 5.1")
Rack units	8 HP
Weight	0.08 kg (0.18 lbs)
